DATE: SEPTEMBER 14, 1993

---

Susan Stuntz at the Tobacco Institute advises that the state of Washington has set hearings on the proposed Indoor Air Standard for December 7, 8 and 9, 1993, in the state of Washington, at a site which Susan had not yet identified. The governor has apparently indicated that the proposed Standard will be released publicly on December 3, 1993. If Susan obtains a draft prior to that date (she may be able to obtain a copy within the next 10 days), she will immediately provide a copy to our office. Apparently the proposed Standard focuses on indoor air quality in general, and the issue of a separate standard for ETS is on the "back burner."
